The World: 7 continents and 5 oceans

Test: Friday, Nov 13

Equator

An imaginary line around the **middle** of Earth. It splits Earth into the **Northern** (top) and **Southern** (bottom) Hemispheres.

Prime meridian

An imaginary line from the North Pole to the South Pole. It splits Earth into the **Western** (left) and **Eastern** (right) Hemispheres.

Pacific Ocean

Biggest ocean. On BOTH sides of the map.

Atlantic Ocean

In the MIDDLE, between the Americas and Europe/Africa.

Indian Ocean

Between Africa and Australia, below Asia.

Arctic Ocean

At the very TOP, where it is icy cold.

Southern Ocean

At the bottom, all the way around Antarctica.
